## ❖ PROLOGUE ❖

The setting: medieval Transylvania. Several hundred years have passed since legendary hero Simon Belmont defeated the evil Count Dracula and sealed him away for what was supposed to be eternity. The people have long since forgotten about the horror of the undead, allowing a few depraved individuals to restore the Prince of Darkness to his former state, sleeping in his coffin by day and preying upon hapless victims by night.

Dracula now plans to get revenge on his old enemy through his descendants by locking Annette, the girlfriend of Belmont's great grandson, Richter, and her sister, Maria, in his dark and gloomy castle.

Once aware of this, Richter takes his ancestor's sacred whip, passed down through the years from father to son, and sets out for Dracula's castle to rescue Annette and Maria, and to seal away the evil Count for good.

# How to Play

Rescue Annette and Maria from Dracula's sinister castle, and entomb the evil Count so the undead walks among men no more!

- ❖ Defeat attacking ghouls with attack items such as the whip and sub-weapons to proceed through the game.
- ❖ Items appear when you destroy a candle or defeat an opponent. Receiving an item increases your power and enables use of sub-weapons, etc. (See item list, pages 10 and 11.)
- ❖ Stages are divided into several areas. The enemy boss waits in the last area. When the boss is defeated, a mystic sphere appears. You clear the stage when you get the mystic sphere.
- ❖ Life decreases each time a player is damaged. If a player's life runs out, or if he falls into a place with no floor, etc., the player goes out of the game.
- ❖ As long as you still have at least one player left, you can continue playing from the beginning of the area where the last player went out. The game ends when you run out of players. Even if the game ends, you can select Continue to continue playing from the beginning of the stage in which you were defeated.
